

rEHR: A package for manipulating and analysing Electronic Health Record data

David A Springate

2015-03-04

Abstract

This is the abstract.

Introduction

To do. See Springate et al. (2014) for more details

The rEHR package

To do.

Setting EHR type

To do.

Importing EHR data

To do.

Querying the database

To do.

Creating an longitudinal dataset

To do.

Incidence and prevalence

To do.

Survival data - matching and time-varying covariates

To do.

Unit conversion

To do.

Practice Sampling

To do.
